

POSTGRADUATE DEPARTMENT OF CHEMISTRY 2018-19

(Conferences, workshops, seminars and FDP)

Conferences

Faculty Development Program (FDP) on July 20-21, 2018, included key lectures on quantum mechanics and its applications in chemistry. Dr. V. Kannappan covered fundamental concepts, while Dr. M. Jaccob discussed models, approximations, and insights into chemical bonding. On Day II, Dr. P. Venuvanalingam addressed reaction modeling, and Dr. R. Vijay Solomon explored quantum mechanics in drug design. The program effectively enriched participants' understanding of these critical topics.

Seminars

On March 9, 2019, Shoolini University of Biotechnology and Management Science hosted a National Seminar titled "Principles and Applications of Stereochemistry and Spectroscopy," organized by Prof. P.S. Kalsi, a Professor of Eminence at the School of Chemistry. The seminar brought together experts and students to discuss advancements in stereochemistry and spectroscopy, highlighting their critical roles in chemical research and applications. Participants engaged in discussions on the latest techniques and innovations, fostering collaboration and knowledge sharing within the scientific community.
